

Lost Sock Republic – Whitepaper

1. Introduction

Welcome to LostSock Republic, the first meme-revolutionary system built on the idea of socks taking revenge on washing machines. No joke. Or maybe just a little...

We don't promise the moon. We promise a story, content, laughter... and if your investment gets sucked in like a sock? At least you'll laugh about it.

2. Vision

To transform meme culture from a temporary trend into a smart community-driven entertainment system built on storytelling, characters, and daily engagement.

Every sock has a story... and every story has a price.

3. Characters

10 main characters, from the wise (who forgets what he said 5 seconds ago) to the evil (who melts from wet wipes). Each one is a vital part of the story—and the system.

4. Content

- Daily short story (55–65 seconds) posted on Twitter and YouTube.
- Daily podcast with Princess Socklena (3–5 minutes) analyzing the story from a revolutionary sock perspective.
- Mixed animation and real-world scenes: socks on Wall Street, in kitchens, in washing machines.

5. Platforms

- Main account: Twitter (X), Instagram, Telegram, Discord, YouTube, TikTok.
- Character accounts (e.g., Socklena, Socktarius, Investor...) that interact as if they are real personalities.

6. NFT System

- Each major scene can be minted as an NFT.
- Varying rarity levels.
- NFTs can unlock rewards, surprises, or be kept as collectibles.

7. Token Distribution

Total Supply = 10,000,000,000 LSR

Category	Percentage
Presale	30%
Founder	10%
Marketing & Community	10%
Future Rewards	10%
NFTs / Partnerships / Surprises	15%
General Reserve	25%

Note: 3–5% of the total supply is allocated to the airdrop and is included in the Marketing & Community allocation.

Liquidity Allocation Note

Liquidity is not pre-allocated as a fixed token percentage. Instead, 30% of the total funds raised during the presale will be used to provide initial liquidity at launch, specifically designed to support the target listing price of \$0.0001.

The remaining 70% of presale funds will be used for key operational purposes such as marketing, development, team support, content production, and emergency reserves to ensure long-term project sustainability.

8. Presale Plan

3 stages:

- Stage 1: 5% at \$0.00003
- Stage 2: 10% at \$0.00004
- Stage 3: 15% at \$0.00005

Launch Price = \$0.0001

9. Airdrop

- 2-week pre-launch campaign
- Tasks: likes, follows, comments, puzzle-solving, shares
- 3–5% of tokens distributed to first 10,000 participants

10. Community Funding

If platform accounts generate income (YouTube, TikTok, merchandise, etc.), 10–15% of that revenue may be allocated to:

- Boosting liquidity (Buyback)
- Rewards for NFT holders

We don't promise profits—but we do reward the worthy.

11. Launch Timeline

- Weeks 1–2: Story releases + podcast + airdrop
- Week 3: Presale begins
- Post-Presale: Token listing at \$0.0001 with initial liquidity support

12. Roadmap

- Build characters
- Prepare story and content
- Launch official accounts
- Start airdrop
- Launch presale
- List token
- Launch first merchandise

13. FAQs

- Why socks? They're the only thing that vanishes without explanation.
- Are you serious? Very—foolishly clever.
- Can I get rich? Only if you believe in your inner sock.

14. Disclaimer

LSR is not financial advice. Nor is it laundry advice.

It's a meme-based social experiment. If you lose a sock after joining us, you're one of us now.

From the washer... to the market... the socks are coming.
